As for ...

Book Review : Frontend Architecture for Design Systems ...

Backends For Frontends solve a pressing concern for mobile development when using microservices. In addition they provide a compelling alternative to the general-purpose API backend, and many teams make use of them for purposes other than just mobile development. The simple act of limiting the number of consumers they support makes them much easier to work with and change, and helps teams ...

Frontend Architecture for Design Systems: A Modern ...

Architectural design is concerned with understanding how a system should be organized and designing the overall structure of that system. In the model of the software development process, as shown in Chapter 2, architectural design is the first stage in the software design process. It is the critical link between design and requirements engineering, as it identifies the main structural ...
