In-service Inspection of Mooring Hardware for Floating Structures Upstream Segment API RECOMMENDED PRACTICE 2I THIRD EDITION, APRIL 2008

In-service Inspection of Mooring Hardware for Floating ...

The Semi-Autonomous Mooring Inspection Robot (SAMIR) combines visual inspection, photogrammetric measurement and Magnetic Flux Leakage (MFL) technology to assess the in-service condition of sheathed and unsheathed wire mooring lines. This system provides quantitative inspection of internal defects, which cannot be seen, by visual inspection alone.

metocean data, and mooring line tension), in-service inspection data, modification/repair data, corrosion data, and operational incident report etc. In developing a description of the mooring system, the typical states and conditions should be considered such as connected/disconnected, intact, transient and damage states.

MOORING INTEGRITY MANAGEMENT

Some standards recommend that an overall risk assessment be conducted on the mooring system, prior to installation. The assessment helps determine (1) where inspection should be focused; (2) what special measures should be taken; and (3) the course of action to be taken in the event of mooring system impairment.

Study on Mooring System Integrity Management for Floating ...

API Recommended Practice (RP) 2I provides guidelines for inspecting mooring components of Mobile Offshore Drilling Units (MODUs) and permanent floating installations. It is an extension of the second edition, which addressed in-service inspection of mooring components for MODUs only.

API RP 2I (R2015)

included in annual mooring service) replacement of worn equipment if absolutely necessary.

Mooring Services - Jordan's Marine

As a general rule for single braid ropes, when there is 25% or more wear from abrasion the rope should be retired from service. In other words, if 25% or more of the fiber is broken or worn away the rope should be removed from service. With 3-strand ropes, 10% or more wear is accepted as the retirement point.

Rope Inc. Rope Inspection and Retirement

when your mooring is hauled in for inspection. In addition to servicing your Maine mooring, we carry mooring tackle onboard our barge for quick repairs on the water. If you need pennants, balls, swivels, or shackles changed, we can do that!! We can pull most moorings up on deck and service them accordingly. Please like us on Facebook
