## AND TEXTILE

**EVIDENCE** The most common form of fiber transfer to be encountered at a crime scene is shedding of a textile. Textiles are things like clothing, carpets, and upholstery. Many textiles are constructed by weaving, or intertwining, together yarns. Yarns in turn are made up of fibers that have been "spun" together.

## **CHAPTER A Study of Fibers and Textiles**

The basis of any textile (an object made by weaving strands of yarn into cloth) is the fiber. Fibers are very thin materials that are strong, resilient, and flexible enough to be combined into something thicker, like yarn. The fibers used to create textiles define their feel, how they react to dyes,...
